Subject: Progress Report of the Parties - preliminary draft

Hi all, here is the long-awaited preliminary draft report. I'm sending to Jamie to circulate among the Secretariat simultaneously as to Sandie and Sue for technical input on the content – this is the first time they are seeing it.

Note this is still very much a draft – there are placeholders such as the discussion of Cladophora on page 3 and the domestic actions section on page 4. Also the priority watersheds map will be updated and the images may change as well. Our focus thus far has been more on the layout, style and format with the goal of providing a template. Now I think it's time to focus on the content again.

Looking forward to your input.
